

Sustainable HANCOCK

NOV 15 DESIGN CHARRETTE

DEAR HANCOCK RESIDENTS --

You're invited to contribute to an academic sustainable design and planning project led by graduate students of the Community & Regional Planning program at The University of Texas at Austin. Graduate students are investigating different aspects of the Hancock Neighborhood such as housing, mobility, economic development, and environmental and cultural resources. With community participation, they will be developing design and planning ideas for the future of the neighborhood.

The students invite all community members, adults and children to the Design Charrette at the Hancock Recreation Center, located at 811 East 41st Street. Your input is invaluable to this shared learning experience, and your presence at the event is greatly appreciated.

DESIGN CHARRETTE

Thursday, November 15 | 7 - 9 PM

Join UT students and Hancock neighbors in a series of fun mapping exercises that will allow us to envision the future of the Hancock neighborhood. Students will also share their ideas on innovative ways to preserve the Hancock neighborhood as a livable and sustainable place.

Enjoy refreshments as you participate!

For more information, please contact Professor Ming-Chun Lee at: mingchun@austin.utexas.edu or (512) 475-6158.
