

Sustainable HANCOCK

DEC
6

Final
Design Presentation

DEAR HANCOCK RESIDENTS --

Come see a SUSTAINABLE FUTURE designed for Hancock!

You're invited to contribute to an academic sustainable design and planning project led by graduate students of the Community & Regional Planning program at The University of Texas at Austin. Graduate students are investigating different aspects of the Hancock Neighborhood such as housing, mobility, economic development, and environmental and cultural resources. With community participation, they will be developing design and planning ideas for the future of the neighborhood.

The students invite all community members, adults and children to the Final Design Presentation at the Hancock Recreation Center, located at 811 East 41st Street. Your input is invaluable to this shared learning experience, and your presence at the event is greatly appreciated.

FINAL DESIGN PRESENTATION

Thursday, December 6 | 7 - 8:30 PM

Join UT Community and Regional Planning graduate students as they present their semester-long design projects that promote the livable, vibrant and sustainable future of the Hancock neighborhood.

Enjoy light refreshments as you participate!

For more information, please contact Professor Ming-Chun Lee at: mingchun@austin.utexas.edu or (512) 475-6158.
